

Team letter

Dear guest,

Our team introduces our innovative project ExoLover - a decentralized platform and devices for online sexual relations with a full transfer of sensations. This topic has become increasingly popular in recent times.

In the modern world, with a shortage of free time, it is difficult enough, and with several aggravating factors, such as complexes, phobias and unhealthy lifestyles, it is practically impossible to organize a quality, safe and regular sex life.

Our project solves a whole range of problems in this area and will attract millions of users around the world.

ExoLover is a project aimed at creating a web platform and developing equipment for full-fledged simulation of sex with a virtual or remote partner. The project is intended to give users a one-of-a-kind and world-first sexual encounter over a private blockchain in a secure environment. The goal of the project is to disrupt the adult entertainment industry by promoting free and healthy sex lives in which sexual satisfaction can be enjoyed anywhere, anytime and with anyone.

At the moment in the world there are many web platforms for all kinds of chat rooms and communication, and there is a huge range of sex toys including sex dolls and robots. There have been attempts to create devices controlled on the Internet, but the imperfection of devices and the risk of loss of privacy make current solutions ineffective.

ExoLover will eliminate the shortcomings and threats presented in existing devices and projects.

- High cost of devices
- Limited user base
- Lack of a full simulation of sexual intercourse
- Difficulties and limitations when registering
- Threats to privacy

Through the creation of a decentralized platform and the use of innovative devices, ExoLover will provide privacy and a uniquely new experience for its users.

The placement of EXO tokens on the ICO is designed to implement the project. All funds raised for ICO will be used to achieve the following objectives:

- Develop a decentralized platform for connecting users on the basis of complete anonymity.
- Technical support, updating and development of the platform.
- Development and implementation of adult novelty devices for quality imitation of sexual relations.
- Marketing and promotion of the project.

After the project is provided with sufficient financing, we expect significant growth due to explosive growth of interest in the entire industry and as a result, the growth of the customer base.

Participants in the pre-sale will be able to buy tokens at a reduced price due to a large number in the offer.

Participation in ICO ExoLover will be appealing to everyone who is interested in the concept of the project.

Potential users of the platform and devices can receive significant savings through participation and provide themselves with cheap access to all options.

The ExoLover team thanks you for the interest shown in our project and invites you to participate in the preparation for the ICO. For assistance in promoting the project in social networks, there is a reward in the form of a bonus "bounty" distributed depending on the degree of participation and benefits.

Yours faithfully,
The ExoLover team.
